

THE GEMINI[®]
Inspiring Innovations

GENERIC HIS

HOSPITAL MANAGEMENT SYSTEM

Towards a Paperless Hospital...

The primary objective of independent medical practices is to move patients through the practice efficiently and easily. Research indicates managing cost effectiveness while maintaining practice growth and patient satisfaction is one of the biggest challenges faced by small clinics. Eventually, rapid growth in number of patients without adequate scale up of supporting systems induces gaps leading to poor service to patients, longer AR cycles with insurers and inefficient operations.

The Gemini brings to its clients the “**Generic HIS**” that will transform the clinic and independent medical practices operate. The Gemini aims to simplify the workflow, streamline patient lifecycle at the clinic/Hospital, produce accurate claims and reduce no shows.

Maintaining a strong control over administrative tasks like appointment scheduling, drug and commodity inventory & Patient Reports is now just a click away. The Gemini ensures that the medical practitioners focus on their primary objectives of providing timely and quality medical treatment to the patients in an unhindered manner.

WHAT CAN YOU DO WITH **GENERIC HIS?**

- **INCREASE YOUR REVENUES AND PROFITS**

Measure and optimize to create better strategies and tactics using standard MIS and standard reports

- **INCREASE BRAND REPUTATION**

Provide a wow patient experience and get more referrals through your happy patients

- **OPTIMIZE PRODUCTIVITY**
